Supplementary Table 1: Difference in log-likelihood of Full regression model (mean, SD, max, min, first, last of evidence values; Equation 6 in Materials and methods) vs reduced model, for each monkey

	Mean	First/Last	SD	Max/min
Monkey H	1268.5	60.0	7.2	5.1
Monkey A	990.0	66.9	14.6	-1.1

Supplementary Table 2: Difference in log-likelihood of regression models including either evidence standard deviation (SD) or both maximum and minimum evidence (Max and Min) as regressors, for each monkey

	Mean	Mean & First & Last
Monkey H	2.3	2.0
Monkey A	14.5	15.7

Supplementary Table 3: Difference in log-likelihood of regression models including either evidence standard deviation (SD) or both maximum and minimum evidence (Max and Min) as regressors, for each monkey

	Mean	Mean, First & Last	Mean, Max & Min	Mean, Max, Min, First & Last
Monkey H	75.2	75.8	6.1	7.2
Monkey A	189.0	199.8	14.7	14.6
